To my past-self...

ABSTRACT

This is an abstract, imported from the file *abstract.tex*.

Abstract section here monograph...

No more than 500 words. Keryword: here!

1. Update of the SRT full dept. name on the 1st page in the file `cseethesis_example`.
2. A change to `defaultbibliographystyle{plain}` in the `cseethesis_example` file instead of the old, which gives blank in-text citation.
3. Inclusion in `cseethesis_example` of `makeglossaries`, the example:
`newacronym{nlp}{NLP}{Natural Language Processing}` for handling acronyms and the closing `printglossary` at the end of the file.
4. Example usage of the acronym package in the `paper1` file: Natural Language Processing (NLP) is the full version of this short version NLP and the long version Natural Language Processing.
5. Addition of `\newcommand{\makepapertobesubmitted}` in `cseethesis` file for manuscripts yet to be submitted.
6. Figure included on the front page in the file `cseethesis_example` since the old logo alternative is tricky.

CONTENTS

Part I	1
CHAPTER 1 – AN OVERVIEW OF THIS WORK	3
1.1 Of this work...	3
1.2 The background	3
1.3 General focus	3
1.4 Research Questions Pursued	3
CHAPTER 2 – DATA AND METHOD APPLIED TO IT	5
2.1 Methods first section of the second chapter	5
2.2 The Data Researched	5
2.3 Methods applied	5
CHAPTER 3 – TABLE OF CONTENTS	7
3.1 Literature first section	7
3.2 The meaning of meaning for...	7
3.3 Humans	7
3.4 Computers	7
3.5 Meaning from a computer perspective aka. computational linguistics	7
CHAPTER 4 – TABLE OF CONTENTS	9
4.1 Results displayed: To be filled after	9
4.2 Results obtained	9
4.3 Resultsn't	9
4.4 Surprises	9
CHAPTER 5 – TABLE OF CONTENTS	11
5.1 Discussion first section	11
5.2 First results.. What can they mean?	11
5.3 Are they answers to RQs?	11
5.4 Possible implication of this work for the NLP community	11
5.5 We all have limitations.. Where this work shows them	11
CHAPTER 6 – TABLE OF CONTENTS	13
6.1 Conclusions first section	13
6.2 All in all where are we now	13
REFERENCES	15

ACKNOWLEDGMENTS

The creation of this template has taken several years, and the shape it is in now would not have been possible without the patient testers out there. To mention just a few who found and reported bugs, and occasionally even provided bug fixes: Gustav Johansson, Sara Sandberg, Yvonne Aitomäki, Fredrik Hägglund, Jesper Martinsson, Patrik Pääjärvi, and Martin Sehlstedt. To all of those I forgot to mention, please accept my apologies.

Luleå, June 2009
Johan E. Carlson

Improvements by Tosin Adewumi, October 9, 2021.

Part I

CHAPTER 1

The raison d'être.

*“This report, by its very length, defends itself
against the risk of being read.”*

Winston Churchill

1.1 Of this work...

Background info and context General focus Thesis statement (research Qs?) Attract attn. Why this topic As you notice some headers are in another language, this is not random is has a point, which we will make in the next section?

1.2 The background

1.3 General focus

1.4 Research Questions Pursued

CHAPTER 2

Methods used

2.1 Methods first section of the second chapter

data collection analysis and interpretation how? Here! Description of the process

2.2 The Data Researched

2.2.1 Collection

2.2.2 Preprocessing

2.3 Methods applied

2.3.1 Hyperdimensional computing

2.3.2 Hyperdimensional computing applied

CHAPTER 3

Literature Surveyed

3.1 Literature first section

Overview of major or important works for this topic Cite Find gap Fill gap

3.2 The meaning of meaning for...

Paragraph with citations

3.3 Humans

Paragraph with citations

3.4 Computers

Paragraph with citations

3.5 Meaning from a computer perspective aka. computational linguistics

Paragraph with citations

CHAPTER 4

Results obtained

4.1 Results displayed: To be filled after

What I did find? What I did not find? wht I did find that was not expected?

4.2 Results obtained

Results which were indeed found

4.3 Resultsn't

Not found

4.4 Surprises

The unexpected unknowns found

CHAPTER 5

Discussion of things

5.1 Discussion first section

Interpret results Data supports goals? Contribution or new? Limitation (scope)

5.2 First results.. What can they mean?

Discuss the results in terms of their possible meaning for meaning

5.3 Are they answers to RQs?

Maybe they are maybe not

5.4 Possible implication of this work for the NLP community

Is this a contribution an extension of current knowledge or are the results something new

5.5 We all have limitations.. Where this work shows them

The limitation, things like data, methods, models, applications, scope basically what it is being covered and what not.

CHAPTER 6

Conclusions made, insights gathered

6.1 Conclusions first section

Finally, you probably like to know how to build your project to a final PDF or PostScript file. Start by verifying that you can compile this document. This is how it goes: Conclusions

6.2 All in all where are we now

After all this note what is being left to the reader and to my committee
